

BRIEF CV, JAVIER GOICOLEA MD.

- 1) Medical fellowship in cardiology at Fundación Jimenez Diaz -Madrid (Spain).
- 2) Staff Cardiologist at Hospital N^a S^a del Pino (Las Palmas de Gran Canary) from 1984-89.
- 3) From 1989 full time focus on interventional cardiology at Hospital Clinico of Madrid
- 4) Since 1999 I occupied the position of head of interventional cardiology at the Hospital Meixoeiro of Vigo, Galicia.
- 5) In 2003 I was also designed chief of Cardiology at the Hospital Meixoeiro of Vigo, Galicia.
- 6) Since May 2004 I have been appointed Head of the Unit of Interventional Cardiology at Hospital Puerta de Hierro of Madrid.
- 7) In two different periods I have been involved in the board of the Spanish working group for interventional cardiology (President 2009-12, board member 2000-3). During the period 2000-3 I was responsible, both for the design and implementation, of the national accreditation in interventional cardiology. The aforementioned accreditation pertains both to individuals as well as to centers in which individuals may obtain the accreditation.
- 8) My academic interest is focused on Interventional Cardiology, on ischemic cardiomyopathy, with special emphasis in the acute myocardial infarction and on minimally invasive approaches.
- 9) As of the last 10 years my interest has also encompassed structural heart disease with a special focus on the Mitral/Tricuspid interventions. Our group has a leading role in Tricuspid interventions, namely Tricuspid clip as well as the implantation of endovascular valves in native tricuspid regurgitation having implanted the first two valves in native annulus in Spain.
- 10) Recently we have been involved in the analysis of the mechanism of acute myocardial infarction through the analysis of aspirated intracoronary thrombus both in COVID and non COVID patients.

10) I have directed four courses on transradial approach in 2003-6 and I am a foundational member of the Spanish Transradial Group. Since 2008 I have codirected 12 monographic courses regarding the percutaneous treatment of chronic total occlusions (AHO). Additionally, I have codirected yearly courses on general interventional cardiology both at the national (CSC) and international level (board member EuroPCR 2009-present)

11) I have participated either as PI or coinvestigator in 6 institutionally funded scientific projects. These encompass the work with two different technical groups regarding the mechanics of the aortic wall as well as fluid disturbances induced by the interventional treatment.

11) I have authored or coauthored more than 180 articles published in International and National Journals.

A handwritten signature in black ink, consisting of several vertical and diagonal strokes, enclosed within a roughly triangular shape.
